

Problems Solved(If Conditions)

If Condition Problems(5)

Problem No: 1

```
▶ #DISCOUNT (I)
n=int(input())
for i in range(n):
    a=int(input())
    print(100-a)
```

```
... 4
      5
      95
      9
      91
      11
      89
      21
      79
```

Problem No: 2

```
▶ #BATTERY LOW(K)
m=int(input())
for i in range(m):
    y=int(input())
    if 1<=y<=15:
        print("Yes")
    else:
        print("No")
```

```
... 3
      15
      Yes
      3
      Yes
      65
      No
```

Problems Solved(If Conditions)

Problem No: 3

```
▶ #greater
a,b = map(int,input().split())
if a<b:
    print("a < b")
elif a>b:
    print("a > b")
else:
    print("a == b")
```

```
... 1 2
     a < b
```

Problem No: 4

```
▶ #HOT OR COLD
v=int(input())
for i in range(v):
    temp=int(input())
    if temp>20:
        print("HOT")
    else:
        print("COLD")
```

```
... 2
     21
     HOT
     16
     COLD
```

Problem No: 5

```
▶ #LUNCH TIME
a=int(input())
for i in range(a):
    x=int(input())
    if 1<=x<=4:
        print("YES")
    else:
        print("NO")
```

```
... 3
     1
     YES
     7
     NO
     3
     YES
```
